What changes to this module or its delivery would improve your learning?

这门课做出什么样的改变或其授课发生什么样的改变将提高你的学习？

1.The teacher can slow down speaking speed.

2.Improve the Openmoodle.It takes a long time to load every time I click in it.

actually, it is should underline some important point to advance the review.

add the information and the PPT more earlier on the openmoodle

Allocate the courses as reasonably as possible and reduce the class hours every day to ensure the efficiency

although the powerpoint is quite delicate, the content is too much to recognize some key points. it will be better if the tutor can underline or mark the key words.

Be slow.

More specific.

Could you please upload the answers of each seminar's questions after it? It would be quite helpful for person who didn't follow it during the passed seminars.

don't read PPT all the time. It is really boring.

go straight to the point. don't talking about nonsense and left the important things after class.

give more details on concepts and theories.

Everything worked fine.

Give me more before the seminar.

I am expected that the tutor could provide us the answer to the questions in paper version after the seminar because it a little bit hard for us to catch all of the right answers during seminars and that is very important for us to learn this module.

I am very satisfied with this module, no further changes should be taken.

I hope that the time of lectures can be longer, which can make me understand better.

I hope there will be more activities in the seminars rather than discussing problems discussed in the lectures.

I really hope that the answers to the questions in our seminar can be posed to the openmoodle after the class. It is hard for us to remember all the thing during the class.

I suggest that the lecturer could use loud-speaker in order to be heard clearer.

I think it would be better if the most important materials can be highlighted, reminding us that we need to pay more attention on them.

I think maybe more analysis about concrete cases make this module better and practical.

I think this is my own problem. I cannot finish reading all of the materials.

I think this module is a little fast. If this module can slow down and the teacher can speak slowly, I would learn better.

I think this module is perfect.

I wish some information could be details in relation to our reality.

I would be appreciated if the face-to-face seminars and lectures could be more.

I'd like to have more time to review the courses.

If the module becomes longer will be better.

if the teacher can slow down a little bit, it may be better.

If there are more seminars for us to discuss about the lecture, I think the module will be better.

Increase the time between each class
international news paper
video from country university lecture
more materials

It can decrease the content of each lecture but increase the times.

It is better if there are more lectures in two weeks.

It is better that the time of the module is longer.

It is better to expand the gap between lectures. We sometimes have 2 lectures in a single day, which is a bit tiring. It would be good to make modules go smoothly, or make Flying Faculty teaching weeks longer.

It would be better if materials can be put on OM before the semester begins i.e. during summer or winter holidays.

That is applicable to all modules.

If not, it is quite hard to follow.

It's good enough.

let us have more time to study. It is better let the teacher teach us for more than two weeks

make the lecture speak slowly

make the seminar more useful and efficient

Maybe more videos will be more helpful.

Maybe speak more slowly.

Maybe the content of each class could be reduced.

Maybe the lecture could highlight key content in PPT.

maybe the teacher can provide the paper booklet.

More access to academic sources would be great.

More adequate materials are needed to help read extensively and deeply.

The PPT can be uploaded earlier.

More cases. More instructions at the beginning of the semester is better.

more discussion in seminars instead of just answering questions

More homework
more humourous
longer
more test

More interaction with the teacher in the lecture will help a lot.

More material in OM, if the OM can more easy to understand will be better.

more teamwork

Nothing

nothing

Nothing.

Open moodle should be better.

Please take students listening ability into consideration, because sometimes I have problem in understanding what lecturer said. But it is also my own problem .

Reduce course content.

Schedule of Seminar 1&2 is unreasonable because the time for preparing is so limited that we don't have enough time to read all materials. I think Seminar 3&4's schedule is reasonable because they have the weekend to prepare for it.

seminars could be structured more efficiently and use other teaching activities rather than just answer lists of questions

Sometimes Video links on the openmoodle cannot be accessed, it would be better if the openmoodle could be improved.

Case briefs alongside with the whole case would be preferable compared with just a long case.

speak slower

Speak slower.

Give answers on the open Moodle after Seminar.

speaking a bit slow in order to easily understand.

The materials of the course could be better which means that some materials were made several years ago and those materials could be updated and have something new

the teacher could speak slower

The teacher might be able to speak a little more slowly so that we can keep up with him all the time

The time of a seminar is limited and I'm wondering if it could be prolonged.

The timetable is too close, it is also a problem of SWUPL, I suggest to change it for the next time. It can give students more time to review.

the timetable of the class can be more reasonable

There could be more different forms of teaching.

This course is even better with feedback.

This module operates well!

Tutor slows down the speaking speed.
